The Global Gaming Industry
(AN OVERVIEW)

As the global gaming industry continues to grow across all markets, the industry remains structured in a way that primarily benefits game developers and perpetuates a one-directional flow of value where players spend money to unlock access to in-game assets and gameplay configurations.

Alongside the disruption of cryptocurrencies across all industries, today, the global gaming industry has seen a massive influx in blockchain-built games, and decentralized applications (dapps) which enable players to capture the utility and value of in-game purchases and asset acquisitions more effectively.

About Viva Classic

Viva Classic is a multi-dimensional play-to-earn game, built on the BEP20 BSC Smart Chain.

Viva Classic is money that community members can earn by learning the skill to win levels. people acquire Viva classic by learning about blockchain gaming and non-fungible tokens (NFTs), and the most dedicated can earn Viva classic by contributing to the play to earn ecosystem.

People all around the world have shown a massive interest in blockchain as an alternative decentralised financial solution because of the profound opportunities associated with it. NFT games are blockchain-based games with in-game asset encryption that allows players to collect them as non-fungible tokens (NFTs). Some of these games reward players with cryptocurrency, while others allow players to collect in-game NFTs that can then be sold for potential profit.

Binance Smart Chain is one of the most paramount blockchain systems that was created by the cryptocurrency trading platform Binance. They are helpful for the development of DeFi protocols and dapp. Since it is independent of the Binance network, Binance Smart Chain can run even if the network crashes. This permits customers to build decentralised apps on a single blockchain because it is developed on a dual-chain architecture.

it is a package full of services and solutions like security, privacy, one-second block time, and faster transactions make it favourable for today's NFT Gaming Industry. This is a golden chance for various DeFi and other blockchain communities to seize the opportunity offered by BinanceSmart Chain.

About the Token

BEP-20 is a user-friendly token standard that permits users to deploy tokens or currencies that are fungible on Binance smart chain, and BNB fuels BEP-20 tokens transfers. it is a standard token on Binance smart chain that has all the necessary functionalities like transferring, viewing token ownership, and returning a balance. BEP-20 token is similar to Ethereum's standard token ERC-20 and Binance smart chain's BEP-2 token. the primary difference between the BEP-2 and the BEP-20 is that they work on different blockchains. the BEP-2 token standard comes under the Binance chain, while the BEP-20 token standard comes under the Binance smart chain.

Viva classic was created with the aim of expanding and satisfying the growing consumer interest for crypto gaming while, satisfying everyone's entertainment needs simultaneously.

Utilizing blockchain technology along with the NFT working mechanism, we are able to design a vibrant trading and exchanging environment where players can earn in multiple ways by collecting and breeding and selling your Viva classic will earn token and competing and winning in Player vs Player (PVP) battle, daily tasks and quests will also see your team winning tokens.

About the Token

Tap-and-earn games to boost player rewards

Features

Viva classic features an entire network of supporting ecosystems along with exciting gameplay - and that's not all that we're offering!

To build the perfect game in every player's dream, we will let players take part in building this awesome world with us.

Some NFT games reward players with cryptocurrency, while others allow players to collect in-game NFTs that can then be sold for potential profit.

Viva classic is one of those NFT games which provide players with tokens through skilled gameplay. All digital assets and data will be open-sourced, giving easy access to all enthusiastic to contribute to building Viva with us while gaining a more unique and personalized experience.

Phases of Gameplay

Viva Classic is easy to play and earn tokens and will be released in 3 phases.

PHASE I

The Oracle and Marketplace

The Oracle is the gateway to the viva single player mode gameplay experience. In this phase, players must spin the oracle and collect gadgets to be able to participate in Levels 1-10.

PHASE II

Kratos Arena

Multiplayer & Arena Battle Mode allows players to choose from 180 armours of different strengths in order to raise their damage resistance and attack strength when participating in Arena Battles.

PHASE III

Metaverse: The High Echelon

Hundreds of multiplayer features will be introduced in Phase 3, such as Armour Upgrades with the Metaverse Blacksmith Avatar customisation, Crop foraging, and more to strengthen your avatar and improve the overall gameplay experience.

Phase I: The Oracle
And Marketplace

Players need to collect a specific number of character to participate in the single player games. character can be collected by winning the game.

There are 10 Levels that players neeed to clear for this Phase. Each level has a corresponding number of tokens to be collected before users can start the game. The Marketplace will also be available for users to buy or trade character with other players.

Phase II: Kratos Arena

This is where the REAL battle starts. Wage wars with other players.

Deck out your avatar and prepare for the Kratos Arena, with a variety of armour and weapons that can help in standard light or heavy attacks. This provides players with a variety of options to gratify their own play style.

There are 180 weapon or character to choose from in this phase. Players can suit up their avatars up to 6 armours or weapons.

◆

How to Play: Kratos Arena

Gameplay mechanics to be released nearer to the launch.

Phase III: The High Echeleon The Metaverse

The High Echelon, is viva own Metaverse where users can further advance their gaming through upgrading their weapons, at the local Echelon Blacksmith, and nourishing their avatar at the StarTroop Tavern, to prepare for battles. The High Echelon, would also serve as a hub for all viva users, and will be helpful to build their community or army, in anticipation for future game optimization.

Gameplay Overview

Users can qualify to play various levels of the game and get rewarded with viva Tokens. The aim for all users is to clear all 10 Levels and earn Alexa tokens plus NFTcards, which will be utilized in Phase II games.

Note that the gadgets collected used for qualification, after the gameplay will be burned, regardless of the outcome. This ensures constant addiction and will supplement the demand of VIva Tokens.

The Oracle

Fully Decentralized Wheel that is controlled by a smart contract, which eliminates the possibility of any fraud with users.
Mystery Box

The Mystery Box can be acquired through playing The Oracle. Users will instantly receive an NFT card if the wheel lands on the Mystery Box panel. However, this will remain unseen and locked until Phase II games are released.

The Fire Pit

Contrary to the name, The Fire Pit is an easy tap-and-earn side quest, where users can earn more rewards. In the game, players complete levels by swapping colored pieces of candy on a game board to make a match of three or more of the same color

DEFI STAKING

Defi staking is the process of "locking" your crypto tokens into a DeFi Smart Contract to earn more of those tokens in return.

VIVA Token holders can earn a passive income of up to 300% APY by staking their Viva tokens in various pools offered for 30 | 60 | 90 days.

By combining DeFi and NFT, Alexa provides a huge opportunity for investors to win Viva rewards.

The daily yield will fluctuate based on the NFTs | Viva tokens staked. DeFi staking is one of the hottest trends in the cryptocurrency industry today. It is a simple yet powerful concept that leverages the benefits of decentralised finance. Moreover, staking is still considered one of the best ways to generate passive income from one's existing Viva holdings.

Liquidity Pool APY: Up to 300%
Token Pairs: VivaClassic-BUSD / VivaClassic-BNB

Users can achieve solid yield returns by holding their crypto. No trades or transactions are required. Finding the right platform for this activity remains essential, however.

Viva Clasic provides such a platform. Our goal is to create a fair competition system between all holders without excluding any group of participants. Alexa is an essential part of the NFT platform, and Viva Classic is working on establishing key mechanics that makes it intrinsically tied to the NFT platform and its value. This interactive DeFi tool allows users to earn passive income against their cryptos.

Viva Classic combines decentralised data storage and decentralised finance. Viva Classic will eventually release various staking vaults allowing token stakes to earn multiple rewards.

ECOSYSTEM

Viva Classic is an upcoming p2e game with a combination of multiple genres, built on BEP-20 BSC smart chain. We are dedicated in creating long-lasting games, communities, and ecosystems. As a result, all token parameters such as total quantity, allocation ratio, lock rate, and so on are carefully evaluated.

Viva Classic have a staking platform where our Viva classic token holders can earn passive income on the platform. Play-to-earn is a model for games where players can earn real money or other rewards by playing. Players of Viva will earn Non-Fungible Tokens (NFTs), or one-of-a-kind items that they can sell for real money.

The game aims at entertaining players with simple, but skill required to win levels which get rewarded with Viva Classic tokens. Viva classic features along with an entire network of supporting ecosystems of exciting gameplay, a diverse range of supporting gears and equipment and real- time bidding and trading environment. Users can participate to boost their Viva Classic Tokens.

There is half chance to win or lose your Viva classic Tokens. There are tokens allocated for the booster pool with a schedule to be released. Users can battle with their powerful warriors with other random users in PVP mode. It is a package full of services and solutions like security, privacy, one-second block time, and faster transactions. This is a golden chance for various DeFi and other blockchain communities to seize the opportunity offered by Viva classic.
